Abstract. The type specimens of Blattodea, Dermaptera, "Homoptera", Hymenoptera, Mantodea, Orthoptera and Phasmatodea housed in the Zoologisches Forschungsinstitut und Museum Alexander Koenig (ZFMK), Bonn, are listed. There are 221 names recorded; of these 179 (81%) are represented by name bearing (i.e., primary) types. Specific and subspecific names are listed alphabetically, followed by the original genus name, bibliographic citation, original label information (in case of primary types), date and place collected, and finally the geographical coordinates (latitude and longitude based on geo-referencing process).

Key words. Type specimens, Blattodea, Dermaptera, "Homoptera", Hymenoptera, Mantodea, Orthoptera, Phasmatodea
